For

***Independent Unannounced Housekeeping Audit of B.C's
Health Care Facilities***

***Performed by Westech Systems FM, Inc
April 1st 2015 to March 31st 2016***

***Prepared by
Westech Systems, FM Inc.
Sept 20, 2016***

Sept 20, 2016

Westech Systems FM Inc. is pleased to submit the following report of the independent housekeeping audit process and results of the B.C. Health Authorities.

Westech Systems FM Inc. is a British Columbia owned and operated company that has focused primarily on providing cleaning\housekeeping auditing services and housekeeping management software solutions for hospitals and other facilities in North America for over two decades. For this most recent independent audit we have built upon the experience gained in performing the audits carried out annually in BC from 2005 through to today. Specifically, clarity changes made to the process have further improved the consistency in which the audits are performed. We have continued to base the methodology on extensive research relating to auditing best practices used in the U.K, Australia, the U.S., and Canada.

Between April 1st 2015 and March 31st 2016, Westech conducted independent audits of the Fraser, Interior, Provincial, Vancouver Coastal, Northern and Vancouver Island Health Authorities in British Columbia. We audited a statistically representative sample size of all the rooms of the health authority owned and operated health care facilities in each of these aforementioned health authorities in four risk categories. All audits were unannounced.

The overall score for a room or area is based on up to 19 inspection elements that have different weights associated with them, depending on the risk category. The overall percentage score for a facility is based on the average score for all rooms audited in that facility. The overall percentage score for a health authority is based on the average of all the facilities audited within that health authority.

Using an established industry benchmark of 85%, all of the participating health authorities (based on an overall average) exceed this target. However, some individual sites did fall below the targeted level of 85%.

Westech performed the recently completed audits with a focus on consistency, and objectivity and will stand behind the results in this report and future audits that we perform. We are also committed to staying abreast of best practices around the world by undertaking research on an ongoing basis. In short, our goal is to provide an independent audit process that assists the Health Authorities in improving the cleanliness of hospitals across B.C.

Sincerely,

WESTECH SYSTEMS FM, INC.

Dean Waisman, President

B.C. Healthcare Facility Cleaning Audit System Defined

Westech Corporate Overview

Westech Systems FM Inc. is a Canadian owned and operated company that has focused primarily on providing cleaning\housekeeping auditing services and housekeeping management software solutions for healthcare facilities in North America for over two decades.

As a firm that provides impartial, unannounced independent housekeeping audits, we are acutely aware of our independent position. As such, it is not our policy to contract housekeepers, or sell cleaning chemicals. Moreover, Westech has never been affiliated with any contract cleaning companies and/or janitorial cleaning product companies.

Background History of the B.C. Facility Cleaning Audit Standards

In late 2004, a common system for measuring Health Care Facility cleanliness was sought on a Provincial scale – the first initiative of its kind in Canada – by B.C.'s Health Authorities. Acting as a collective, the Health Authorities issued a Request for a Proposal that was awarded to Westech Systems.

Utilizing 20 plus years of experience and research relating to best practices in the U.K., Australia, the U.S. and Canada, Westech helped achieve the following:

1. Developed a common set of cleaning standards.
2. Developed an audit system specific to the needs of the participating Health Authorities.
3. Performed independent audits of Health Care Facilities in British Columbia.
4. Provided standardized reporting processes for both the internal and independent quality audits;
5. Created an audit system for internal use at all the public Health Care Facilities. All of this was realized using current best practices based on extensive worldwide research and state-of-the-art computer technology.

B.C. Facility Cleaning Audit System Standards & Technology Progress from 2005 to the Present

Following the first independent audit conducted in British Columbia by Westech in June 2005, Westech has worked closely with the BC Health Authorities and other Canadian Health Care Facilities to enhance the tools and process to ensure that they are consistent with industry best practices.

Key Milestones of the Program from 2005 to the Present Include:

- Westech has completed independent audits on an annual basis for up to 170 healthcare facilities at all BC Health Authorities every year from 2005 to 2016.
- Westech has done all the training of auditors in British Columbia (including those auditors who work for the Health Authorities) using the B.C. Facility Cleaning Audit Program as well as other sites across Canada to ensure audit result consistency.

- The average overall score for all the Health Authorities in British Columbia is over 89.51%. The acceptable benchmark score is 85%.

Westech has met with the B.C. Housekeeping Technical Team on a monthly basis since 2005 to ensure that the auditing standards are keeping up with industry best practice.

In summary, Westech is extremely proud to be providing such an important service and we are looking forward to continuing to play a significant role in the process of objectively improving the cleanliness of Health Care Facilities across Canada.

B.C Healthcare Facility Cleaning Audit System Overview

Some of the key components of the Audit System are:

- **Version 8B of the Standards** detailing the acceptable cleaning outcomes of the different inspection elements (toilets, walls, floors, beds, patient equipment, showers, tubs, doors, etc.) within rooms that are cleaned. The auditing standards also provide detail as to what is included in the 19 inspection elements. The standards are compatible with the Ontario PIDAC guidelines for visual assessment audits.
- **A methodology on how to divide every area in a Health Care Facility into four different risk categories - Risk 1: Very High Risk (R1); Risk 2: High Risk (R2); Risk 3: Moderate Risk (R3); and Risk 4: Low Risk (R4).** Rooms categorized in a Very High Risk area such as an operating room have a lower tolerance for unclean inspection elements than rooms deemed Low Risk, such as a maintenance area.
- **A weighted scoring system** that puts more emphasis on inspection elements such as beds, toilets and other items that have a higher chance of hand contact points, thus increasing the risk of spreading infection. This concept of weighting is based on global best practice methods.
- **State-of-the-art software and technology** to make the auditing process as consistent and objective as possible by automating many of the functions. Major benefits include:
 - ✓ Less data input resulting in fewer human errors and significantly less time consumed.
 - ✓ Consistency amongst auditors as a direct result of standardized formulas built into the system.
- **Rigorous training programs and systems** to monitor the consistency of auditors.

Independent Audit Summary Results:

Between April 1st 2015 and March 31st 2016, Westech conducted independent audits of the Fraser, Interior, Provincial, Vancouver Coastal, Northern and Vancouver Island Health Authorities in British Columbia. Some of the key details of this external audit are as follows:

- Audited a statistically valid representation of the Fraser, Interior, Provincial, Vancouver Coastal, Northern and Vancouver Island Health Authorities in B.C. using the Provincial Audit Housekeeping System described above.
- Of the rooms audited, we examined a proportionally higher percentage of high risk rooms in the R1, R2 & R3 categories compared to R4 rooms. In addition we attempted in most cases

to spread these audits throughout the entire facility in order to get a true reading of the cleanliness of the facility.

- The overall score for a room is based on a weighted score for up to 19 inspection elements that could be assessed.
- The overall percentage score for a health care facility is based on the average score of all the rooms audited in that facility.
- The overall percentage score for a Health Authority is based on the average of all the scores of all the facilities audited within the Health Authority.
- The percentage scores for the Health Authorities are to be interpreted with a percentage system that is based on best practice in the industry. This best practice benchmark is 85%. The following provides a definition on how to interpret the percentage scores:

Percentage Range	Action
85% and above	Industry benchmark target
75% - 84.99%	Improvement is needed
65% - 74.99%	Improvement is necessary
Below 65%	Take immediate action

- It should be emphasized that the following overall scores for each Health Authority are based on an audit performed by Westech at a point in time and can easily vary over time. Moreover, the best measure of a health care facility's cleanliness is to monitor both the independent audit results and regular internal audit results over a period of at least one year to determine if any trends or patterns exist.
- Westech recommends that if a facility's overall score falls into the range where improvement is necessary, the Health Authority should address the issue immediately and perform a non-scheduled independent audit to ensure that the problem has been rectified.

The summary results for participating B.C. Health Authority are as follows:

Summary Results All Health Authorities	Score
Average Score Fraser Health	90.08
Average Score Interior Health	87.78
Average Score Northern Health	89.27
Average Score Provincial Health Services	91.21
Average Score Vancouver Coastal Health	89.47
Average Score Vancouver Island Health Authority	89.50
Average Score All Health Authorities	89.55

The following pages outline the audit results, in alphabetical order, by participating B.C. Health Authority and community.
