education sessions delivered
by a variety of
health care professionals*

**Dietitians
Registered Nurses
Doctors
Pharmacists
Cardiac Technologists**

Health Matters Education

Portion Distortion

Learn how our environment tricks us into eating more than we think. Together we will discuss strategies to conquer these pitfalls.

Craving Change™

Understand WHY you eat the way you do, comfort yourself without food, change your thinking, change your eating.

This workshop runs once a week for 5 weeks.

Fueling Your Body

Come join the discussion and learn how food works in your body. Learn how to eat to feel better and maximize your energy.

Healthy Feet

A self management workshop for anyone who would like to learn more about ways to take care of their feet and prevent long term complications.

A Good Night's Sleep

Learn about the behavioral and environmental factors that may be interfering with your sleep. Practical suggestions to try and improve your rest.

Living Well With Chronic Obstructive Pulmonary Disease

In this 3 week education program you will learn skills to manage COPD and adopt healthy new lifestyle behaviors.

To Register, Call 250-286-7151

Health Matters Education

Introduction to the Heart

A short overview of your heart and how the electrical, plumbing and framing works together!

Medication Management

Are you sometimes baffled by your medications? Join this session with a hospital pharmacist to arm yourself with the knowledge to use your medications safely and effectively.

Complementary & Alternative Medicines in Chronic Disease Management

Come and be educated in the common interactions and side effects of some of the popular alternative/complementary medicines in the market today. Learn how to choose them and prevent any interactions with the usual medicines.

Stress Response/Introduction to Mindfulness and Meditation

Learn about the stress response in the body and how it affects our health. Join us to learn how mindfulness and meditation can influence this, and help you to change your reaction to stress.

Part of Heart Matters Education Series

To Register, Call 250-286-7151

Health Matters Education

Heart Healthy Eating

Learn about how you can improve your cholesterol or blood pressure with diet. Join us as we discuss sodium, fats, cholesterol and Mediterranean style eating in this 90 min. class.

Hypertension

Also known as the "silent killer". Learn what hypertension (high blood pressure) is and how medications and lifestyle can help manage this very common medical condition.

Why Exercise is Good for the Heart

The talk focuses on the basics of why exercise is good for the heart, basic cardiac rehabilitation exercise guidelines & strategies to help overcome obstacles to making exercise a regular habit.

Talk with the Doc

Have the opportunity to discuss with a physician any questions you may have about general health and wellness.

ERAS

(Enhanced Recovery After Surgery)

While waiting for surgery: Learn what you may do to improve your post-operative healing and health. This class is based on the Passport to Health available from your Surgeon, Physician or Nurse Practitioner.

To Register, Call 250-286-7151
