

North Vancouver Island Beach Sampling Results

Sampling Season for 2021 Complete

No Water Quality Issues Identified

Potential Water Quality Issues

Swimming Not Recommended

No results available

Notes:

- Results indicated are the number of *E.coli* (fresh water) or Enterococci (salt water) per 100 mL of sample water
- L1 indicates there were less than 1 *E.coli* or Enterococci present in the sample
- **Updates will be provided once a week to reflect any new sample results received.**
- **Results are most predictive of overall water quality for 2 days after the sample date.**

Interpretation:

- **GREEN:** Beaches are generally considered microbiologically safe for swimming when single sample results, and/or the average (geometric mean) for the most recent five samples, are less than 200 (fresh water) or 35 (salt water)
- **YELLOW:** An individual result has exceeded 200 (fresh water) or 35 (salt water), so a higher risk of illness may be present and more sampling needs to be conducted to further inform the situation.
- **RED:** Results from a single sample has exceeded 400 (fresh water) or 70 (salt water), or the average (geometric mean) for the most recent five samples is greater than 200 (fresh water) or 35 (salt water) so there is a significant risk of illness and a beach advisory is generally necessary.
- **GREY:** Results not received for a particular beach during this current bathing season, please contact your local government/municipal office to inquire about testing ability.

Under certain circumstances, an Environmental Health Officer may deviate from the above recommendations for a particular beach. If you would like further information, please contact your local [Health Protection office](#).

Beach	Location	Sample Results
	COMOX LAKE CAMPGROUND	
	Cumberland – Fresh Water	
	Beach, East	No testing results for 2019 or 2020
	North Shore West	No testing results for 2019 or 2020
	COMOX LAKE NORTH SHORE BEACH	
	Cumberland – Fresh Water	
	North Shore, East	No testing results for 2019 or 2020
	North Shore, West	No testing results for 2019 or 2020

GOOSE SPIT BEACH

Comox – Salt Water	
Inside Center	Bacteriological Sample on 19/05/2021 – Enterococci : LT5
	Bacteriological Sample on 12/07/2021 – Enterococci : 18
